UIU News Box: A platform for users to post comments and stay updated on club activities within the UIU campus.

House Price Prediction - Flask, HTML, CSS

[\[Github link \]](#)

House Price Prediction: A web-based platform where users can predict house prices by utilizing a trained machine learning model.

Bin Automator - Using Arduino uno , ESP32

[\[Youtube link \]](#)

Bin Automator: An IoT-based waste management project using Arduino Uno and ESP32 to automatically separate metal, organic, and plastic waste via sensors. Users can monitor waste levels in each bin type through a web interface for efficient tracking.ediction: A web-based platform where users can predict house prices by utilizing a trained machine learning model.

Poultry Market Price Monitoring - PHP, MySQL, HTML/CSS, and Chart.js.

[\[Github link \]](#)

A web-based system for tracking and analyzing poultry market prices (broiler chicken, eggs, poultry feed) across Bangladesh. It offers live dashboards, regional comparisons, historical price charts, price alerts, smart recommendations, and notices from government sites. Built using PHP, MySQL, HTML/CSS, and Chart.js.
